additional information.....**

Hi Rob,

Could you please send the shape files for the new probing  
results?

Also, there seem to be some discrepancies between the locations  
that NOAA is plotting and the ones that the CPG is plotting. They  
suspect some of these discrepancies may be due to different  
naming conventions being used by NOAA, EPA and the CPG.

Reyhan is putting together a list of datasets they are missing  
and/or having trouble with, but won't have it ready today. Since I  
will be out of the office the next two weeks, she was wondering if  
she could speak/email directly with you (and/or your GIS people)  
and Scott Kirchner from CDM to straighten things out. This will  
allow them to complete their review of the revised SSP2 locations  
while I'm away, so that we can get back to you shortly after I  
return.

Please let us know if this is okay.

Thanks,  
Stephanie
